## EXPERIENCE

---

### Bornlogic

Front-end Developer

Aug 2022 – Feb 2025

Remote

- Led the front-end development for the company's new Business Center, building the user interface and core features using React and TypeScript.
- Contributed significantly to the development of the reusable component library, focusing on accessibility and intuitive API design, with Storybook documentation.
- Collaborated to implement and maintain the micro-frontends architecture foundation using Single SPA and webpack, supporting multiple application teams.
- Contributed to the platform's stability by writing integration tests with Playwright and React Testing Library.
- Collaborated closely with back-end team to integrate REST APIs into React applications using modern data fetching libraries (swr, react-query).

### Mutual

Front-end Developer

Dec 2020 – Aug 2022

Remote

- Developed web applications with Create React App and Next.js in TypeScript, using Material UI.
- Developed mobile products with React Native, using react-native-cli and Expo.
- Enhanced production error monitoring for web and mobile applications by integrating Sentry on GitLab CI/CD pipelines, accelerating bug identification and resolution.
- Improve stability on web and mobile platform by writing integration tests using Cypress and React Testing Library.

## PROJECTS

---

### Personal Blog and Website

Jan 2019 – Present

- Developed a static website using Astro and Tailwind CSS, hosted with GitHub Pages.
- Implemented integration tests with Playwright to validate the site's stability and usability.
- Wrote articles about web development, developer tools, mathematics, statistics, and data visualization.
- Added interactive code examples to articles using CodeSandbox and React, facilitating practical learning for readers.

## EDUCATION

---

### Universidade Federal Rural do Rio de Janeiro

Economics

Jan 2015 – Jan 2020

Seropédica, RJ

## LANGUAGES

---

- English: Fluent.
